Products with DENTORI T-Mark Sold in Japan

PSE Mark of Electrical Appliances and Materials Safety Law (DENAN) replaced the previous T-Mark of Electrical Appliances and Materials Control Law (DENTORI) in 2001.

The original DENAN enforced in 2001 required to replace DENTORI mark with PSE Mark at the time of sales after the transition period. According to this rule, for example, a distributor is not allowed to sell an AC/DC adapter with T-Mark on April 1, 2008 and thereafter.

In December 2007, DENAN was revised. New rule allows sales of products with DENTORI marking label in Japan with no time restriction. For these products, submission of an additional report to METI nor repeat 100% product inspection test is not required. This rule is applied to products already imported in Japan before the transition period is elapsed. Manufacturing or importing products with DENTORI marking label after the transition period is strictly prohibited.

Under DENAN, DENTORI products are grouped into three types, 5 yr., 7 yr., or 10 yr. type. Products with DENTORI marking label are allowed to be imported into Japan until March 31, 2006, 2008, or 2011, respectively or a certificate expires (for Category A only), whichever comes first.

Transition period of 7 yr. type products ends on March 31, 2008.

5 yr. type Transition date: ~ March 31, 2006	
Category A SPs	Water heater, Steam bath, Aquarium heater, Food waste disposer, Vending machine, Motor operated toy, Bubble generator, etc.
